

ASHAN KAUSHANKA PATHIRANAGE

SRE | DevOps | Platform | Team Lead | Cloud Infrastructure | Automation

+94 717 584 677 ashankaushanka96@gmail.com https://www.linkedin.com/in/ashan-kaushanka
https://ashankaushanka96.github.io/ashans-portfolio Galle, Sri Lanka

SUMMARY

Site Reliability Engineer with 5+ years of experience optimizing AWS infrastructure and enhancing cloud system reliability, now leading SRE initiatives as an Associate Team Lead. Skilled in automating CI/CD pipelines, implementing robust monitoring with Datadog, and reducing operational costs by 25% through strategic resource management. Adept at driving system uptime improvements, mentoring engineering teams, and accelerating incident response, ensuring 99.9% availability and performance excellence.

EXPERIENCE

Associate Team Lead SRE

GTN

- 04/2026 - Present Colombo, Sri Lanka
- Promoted to Associate Team Lead, guiding feed ops SRE strategy across EC2, MSK/Kafka, Solr, Redis, EFS, and S3 in 4 AWS regions.
 - Mentor SREs, reviewing infrastructure changes and CI/CD designs before production rollout.
 - Own on-call escalation strategy and lead incident response for critical feed infrastructure outages.
 - Drive architecture decisions for Kafka, Solr, and Redis clusters across reliability, cost, and performance.
 - Translate infrastructure roadmap priorities into sprint goals with engineering leadership and capacity planning.

Senior Site Reliability Engineer

GTN

- 04/2024 - 04/2026 Colombo, Sri Lanka
- Reduced deployment times by 40% by architecting and optimizing GitLab CI/CD pipelines with automated testing and deployment.
 - Increased system uptime resulting from implementing Datadog for critical systems monitoring and systematized incident response.
 - Optimized cloud costs by 25% through initiatives managing resources across AWS accounts without sacrificing availability.
 - Designed and managed AWS infrastructure across 2 regions with disaster recovery plans ensuring 99.9% uptime.
 - Led incident response drills improving system recovery time across critical platforms.
 - Collaborated with development teams to optimize application performance, reducing latency consistently.
 - Trained junior SREs on best practices and incident management, enhancing team response efficiency.

Site Reliability Engineer

GTN

- 04/2021 - 04/2024 Colombo, Sri Lanka
- Supported AWS migration for 100+ servers across regions, reducing latency by 30% through optimized EC2, RDS, and VPC setups.
 - Established infrastructure as code frameworks with Terraform, Packer, and Ansible, enabling consistent, repeatable, and scalable deployments across environments.
 - Maximized software release speed by 40% by optimizing GitLab CI/CD pipelines for Java and C++ projects.
 - Lowered critical incident recurrence by 30% by implementing Datadog monitoring solutions with custom alerts and dashboards.
 - Recognized issues and conducted root cause analysis of critical production incidents and applied preventive controls, reducing recurrence and strengthening system stability.

KEY ACHIEVEMENTS

- Dashboard Creation**
Developed interactive dashboards in React and Python for streamlined operations.
- Zero Downtime Deployment Strategy**
Designed and implemented a zero downtime deployment strategy that was adopted company-wide, leading to 99.99% availability during updates.
- Cost Reduction through Optimization**
Engineered a cloud resource optimization framework that resulted in a 20% cost reduction while enhancing application performance.
- Cloud Cost Optimization**
Cut cloud costs by 25% with strategic AWS resource management.
- Deployment Time Reduction**
Reduced deployment times by 40% optimizing GitLab CI/CD pipelines.

SKILLS

AWS	GCP
Terraform	Packer
Docker	Kubernetes
GitLab	Bamboo
GitHub Actions	GitHub
Python	Java
React	Spring
PyQT	JavaScript
Linux	Windows
MySQL	SQL
ML/DL	Generative AI
	Postgres
	Oracle
	FastAPI
	JavaFX

CERTIFICATIONS

Certified Kubernetes Administrator (CKA)

Certification ID: LF-d8tg2awomg

AWS Solution Architect Associate

Certification ID: AWS04794799

Red Hat Certified System Administrator

Certification ID : 220-087-555

EXPERIENCE

Network Engineering Intern

N-Able

📅 06/2019 - 12/2019 📍 Colombo, Sri Lanka

- Fine-tuned network performance, increasing connectivity speed by {40%}, resulting in enhanced scalability for the Metro Ethernet project.
- Enhanced base station functionality within the Self-Organizing Network (SON) project, enabling more efficient network operations.
- Enhances self-optimization, configuration, and healing for reliable network performance.

PROJECTS

All In One Watcher

Python agent for Unix hosts tracking process health, CPU/memory, log size, and ports. Auto-restarts processes, alerts via AWS SES. Real-time metrics to Datadog. Self-healing daemon, Ansible fleet deployment.

GitHub: <https://github.com/ashankaushanka96/all-in-one-watcher>

Atlas Dashboard

SRE dashboard with React 19/Vite, FastAPI, MySQL, Redis for AWS (EC2/ECS/EKS/Lambda/MSK/ElastiCache/Route 53) control. Adds WebSocket status, tag scheduling, Datadog metrics, Entra ID SSO/RBAC, remote watcher.

GitHub: <https://github.com/ashankaushanka96/atlas-dashboard>

Live Demo: <https://ashankaushanka96.github.io/atlas-dashboard/home>

Instance Scheduler

Serverless AWS Lambda solution that automates EC2 start/stop scheduling using tag-based cron expressions and CloudWatch Events, provisioned via Terraform across DEV/UAT/PROD environments to cut costs during off-hours.

GitHub: <https://github.com/ashankaushanka96/instance-scheduler>

FTP File Downloader

Python script pulls files from FTP, diffs and backs up with local copies, validates ISIN, emails updates. Logs rotate/retain for audits.

GitHub: <https://github.com/ashankaushanka96/ftp-file-downloader>

GitLab Pipeline Automation

- Developed and deployed comprehensive CI/CD pipelines for Java and C++ applications, integrating build, test, and deployment workflows tailored to environment-specific configurations.
- Amplified deployment efficiency by 35% through automating provisioning with Terraform and Packer, and configuration with Ansible.
- Created reusable pipeline templates and shared libraries for Standardization, including automated quality gates and security scanning.

AWS Infrastructure Modernization

- Increased data center efficiency by 30% by leading a multi-region server migration from Ireland to North Virginia and Singapore.
- Boosted deployment efficiency by 25% by implementing infrastructure as code practices.
- Enhanced security posture and operational efficiency.

Advanced Monitoring Implementation

- Improved system visibility by 30% by deploying comprehensive Datadog monitoring solution including APM
- Improved system uptime by 15% by creating custom dashboards and alerts for proactive management
- Implemented synthetic monitoring and centralized log management

EDUCATION

B.Sc. (Hons) Engineering in Electronic and Telecommunication

University of Moratuwa

📅 2016 - 2021

📍 Moratuwa, Sri Lanka

GPA

3.2 / 4.2

Advanced Level

Richmond College

📅 2011 - 2015 📍 Galle, Sri Lanka

- 3A's
- Z-Score: 2.3875
- District Rank: 37
- Island Rank: 325
